Results - Geodemographics Groups

Φ value is continuous
Φ > .05 indicates a weak correlation between the antecedent has a positive effect of the consequent.
Φ > .10 indicates a moderate correlation between the antecedent has a positive effect of the consequent.
Φ > .15 indicates a strong correlation between the antecedent has a positive effect of the consequent.
Φ > .25 indicates a very strong correlation between the antecedent has a positive effect of the consequent.
Akoglu, H., 2018. User's guide to correlation coefficients. Turkish Journal of Emergency Medicine. doi:10.1016/j.tjem.2018.08.001.

Results - Regions

(Left Panel) observed confidence level for the rule "{ } → {Fast-food}"; (Central Panel) confidence estimates for the rule "{Italian} → {Fast-food}"; (Right Panel) confidence value estimates for the rule "{British} → {Fast-food}" Note: Rules with phi value less than 0.25 were marketed as NA.
